S Yorks	51%	10%	22%	1%	2%	6%	8%

Notes: * The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification. ** A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Notes: * A dependent child is a person in a household aged 0-15 (whether or not in a family) or a person aged 16-18 who is a full time student and in a family with parent(s). ** For the Census, part-time is defined as working 30 hours or less a week. Full-time is defined as 31 or more hours a week. *** For the purposes of this table, a lone parent is defined as a parent with a dependent child living in a household with no other persons (whether related to that child or not). This definition is to be distinguished from the standard definition of a lone parent used in other tables.
